

Tower Inspection Report

Field	Details
Report ID	TIR-2025-002
FCC ASR Number	A0028075
Owner	AT&T WIRELESS SERVICES
Location	NORTHLINE & HURRON, RIVER ROMULUS, MI
Coordinates	Lat 42.215278, Lon -83.411111
Tower Type	Pole
Overall Height (AGL)	34.1 m
Structure Height	34.1 m
Registration Status	“Active” Compliant
Registration Date	06/23/1997
FAA Study Number	96-AGL-3660-OE
Inspection Date	2025-02-03
Inspector	J. Kowalski

Structural Assessment

Pole structure is in acceptable condition. Minor surface corrosion noted at base plate. All mounting hardware torqued to specification. Foundation appears stable with no visible cracking.

Visual Inspection “ Foundation

Visual Inspection â€” Splice Connections

Grounding & Lightning Protection

Grounding resistance: 4.1 Î© (within spec). Ground rod connections inspected â€” one connection requires cleaning and re-bonding.

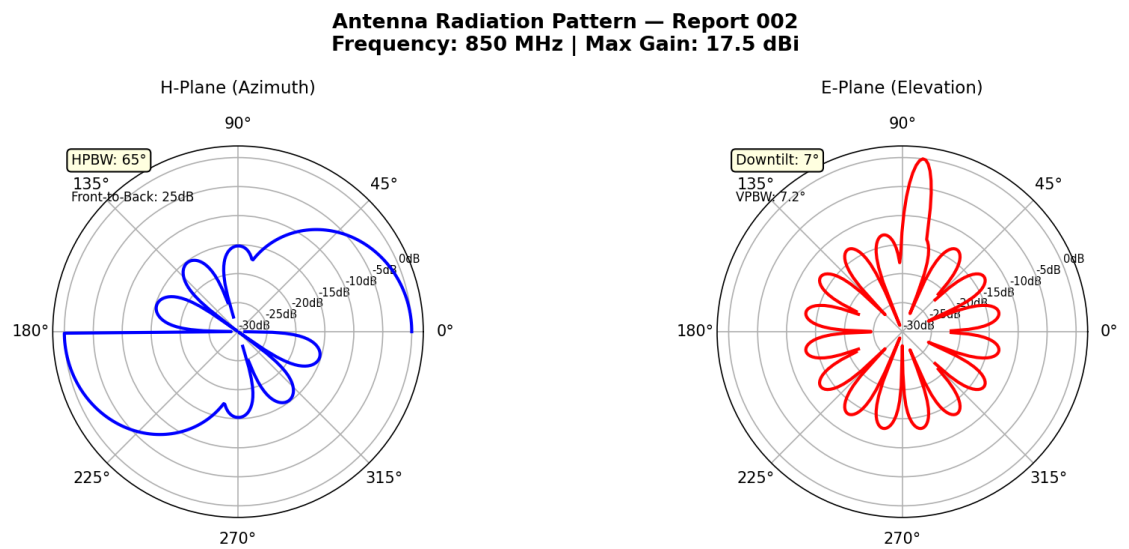

Summary

Minor maintenance items identified. Ground bond remediation recommended within 60 days. Priority: MEDIUM. Next scheduled inspection: 2025-08-03.

Data Source: [FCC Antenna Structure Registration \(ASR\) Database](#) â€” U.S. Federal Communications Commission. Tower registration data is public record.

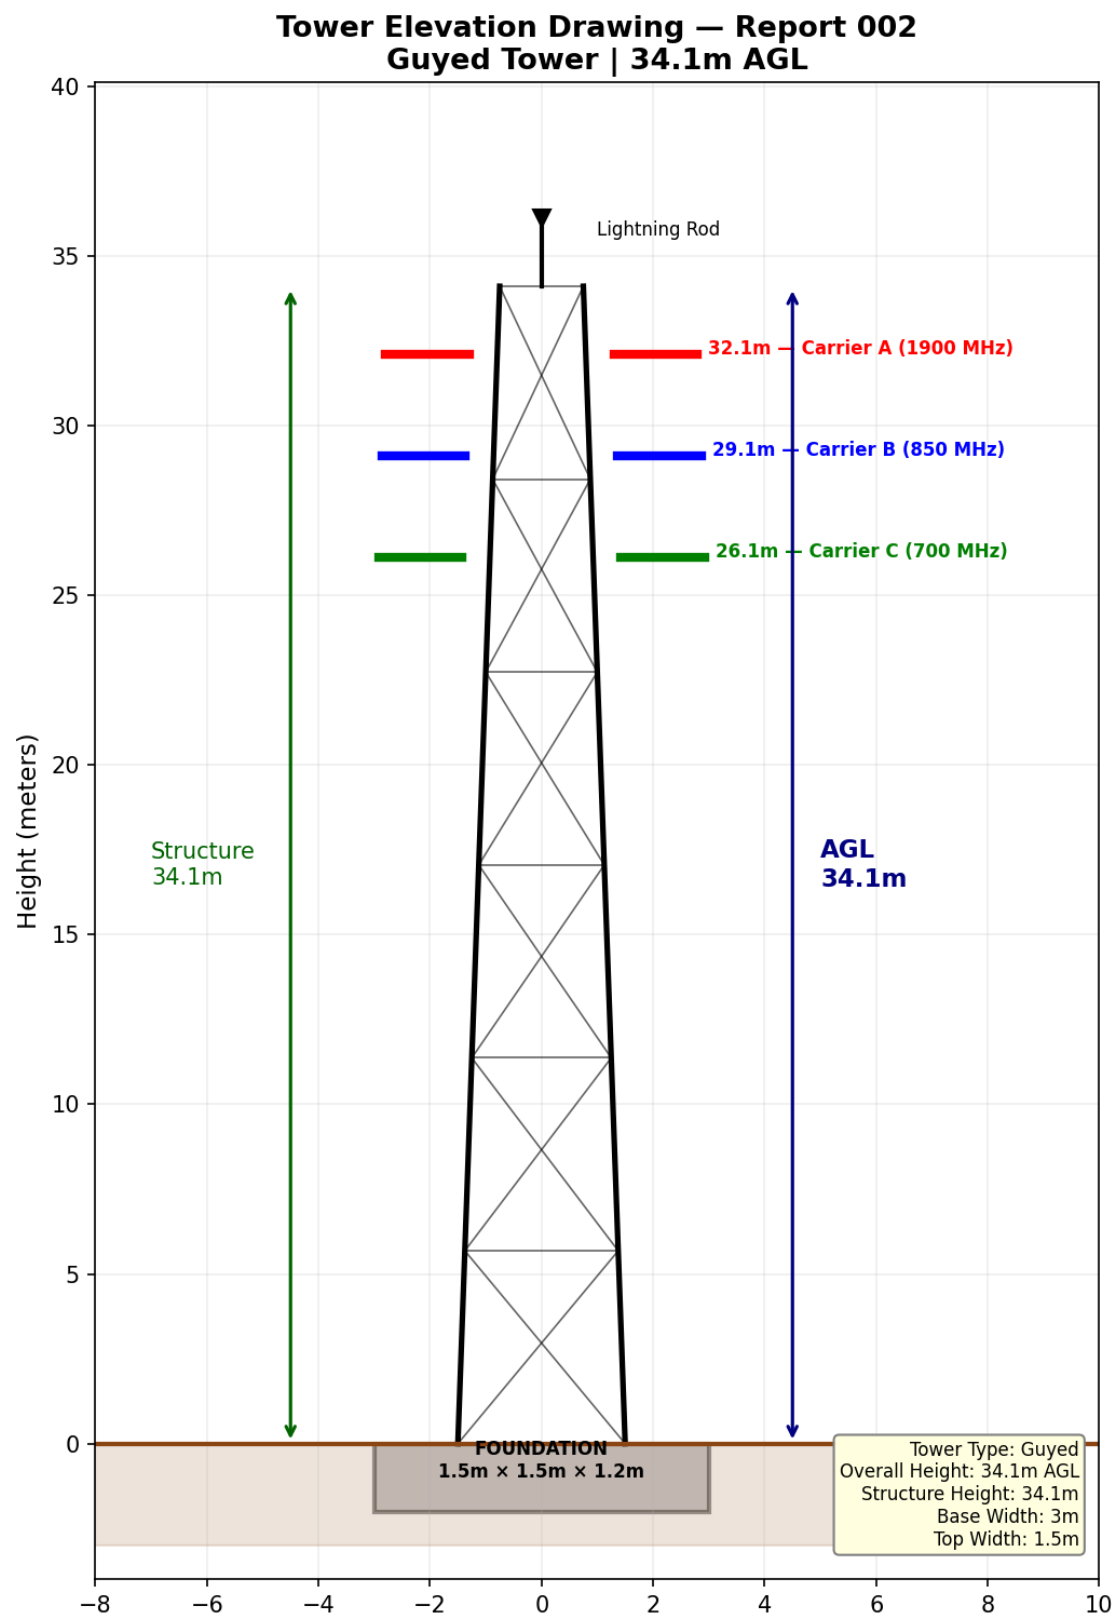

Technical Documentation

Antenna Radiation Pattern

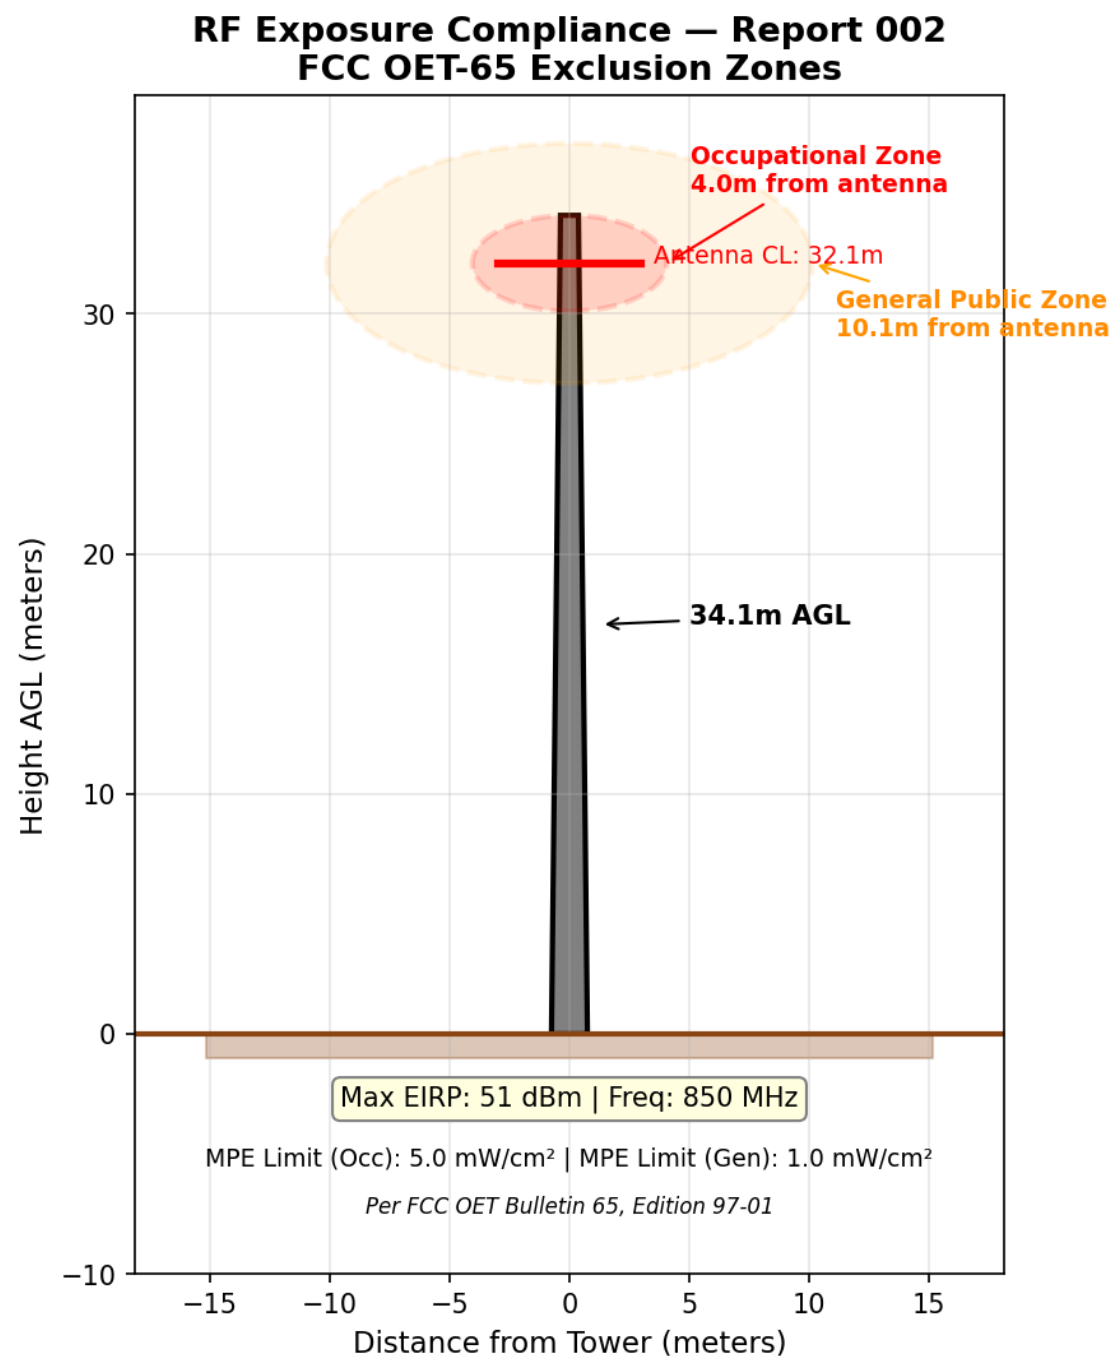

H-plane and E-plane radiation patterns for 850 MHz sector antenna. Lower frequency provides wider coverage lobe. HPBW: 65° azimuth, 7.2° elevation with 7° mechanical downtilt.

Tower Elevation Drawing

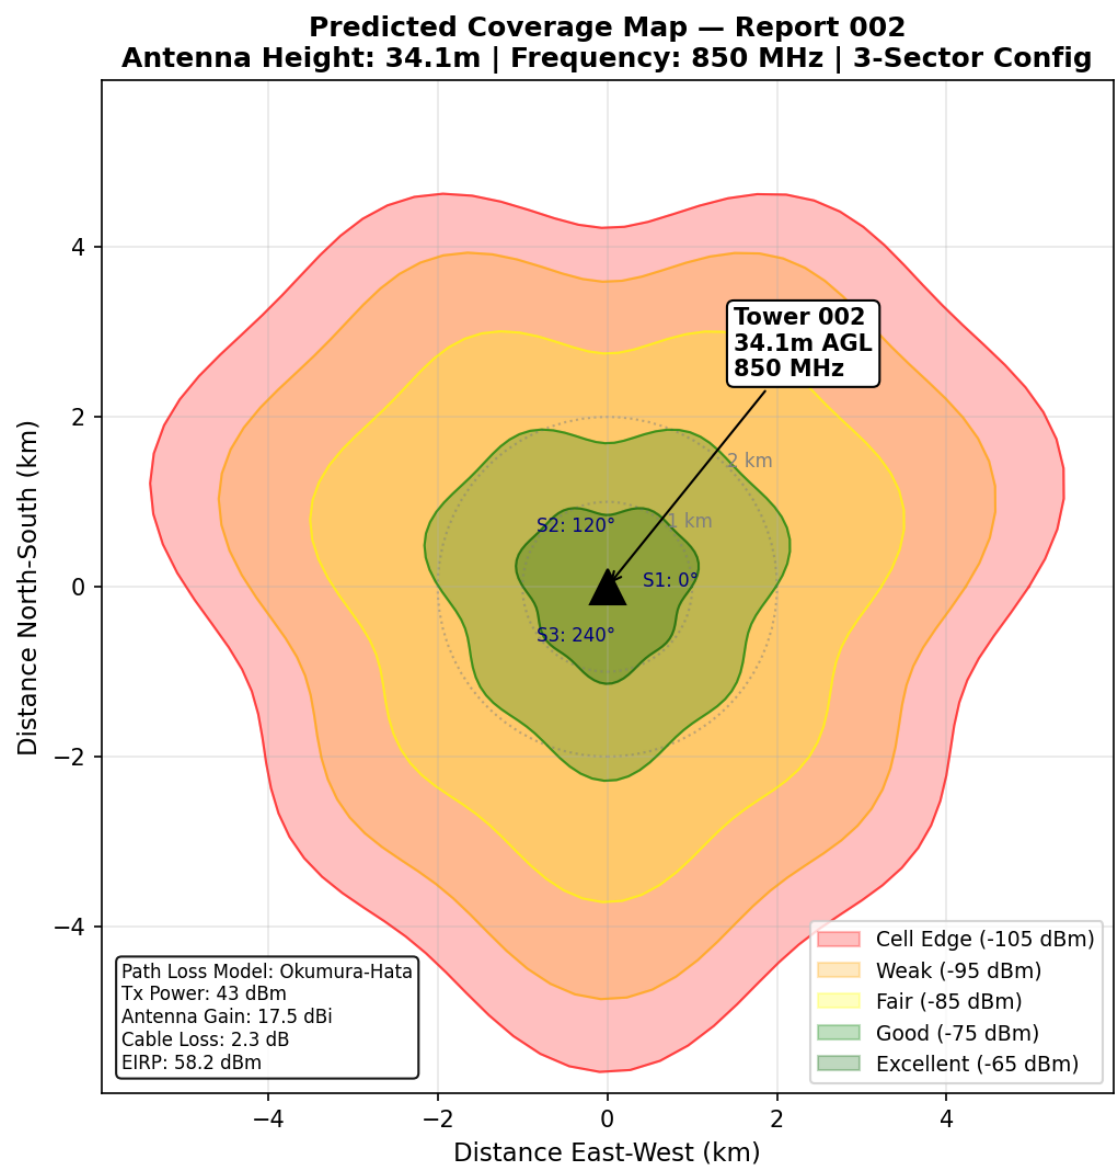

Guyed tower elevation drawing showing 34.1m AGL height. Antenna mounting positions at 32.1m, 29.1m, and 26.1m. Cross-bracing at 5m intervals with diagonal members.

FCC OET-65 exclusion zones for 850 MHz operation. Occupational zone: 4.1m. General public zone: 10.1m. MPE limits: 5.0 mW/cm² (occupational), 1.0 mW/cm² (general public).

Predicted Coverage Map

Coverage prediction at 850 MHz showing extended range due to lower frequency propagation. Cell edge at approximately 5 km with -105 dBm threshold. EIRP: 58.2 dBm.
